Horace (65-8 B.C.) recommended that literary composition be kept from the public eye for nine years, at least. The prudence of this advice appears lost in our modern yearning to publish more -- more rapidly.

In an attempt to make its wealth of material more readily available, we have prepared this ten year composite index of the Archives of Dermatology. We hope it will be of a ready bibliography for the busy student, academician and practitioner, alike.

We wish to gratefully acknowledge the assistance of Miss Ann Legge, Mesdames Harley Bledsoe, Judy Young, Ginnie Malone, Kay Smith, Norma Maupin, Orman Simmons, Faye Powers, and Mr. Hosea Young. To Mr. Stevens Rice, University Microfilms, Inc., Ann Arbor Michigan, we express our sincere appreciation, for this excellent, yet inexpensive reproduction of the index. The American Medical Association kindly gave permission to copy the 20 indices of the Archives of Dermatology.
